

Ezguard – A unique way of controlling your security services patrol. Making use of a mobile phone, you can now collect your patrol's checkpoints data, allowing full flexibility and scalability. **Ezguard** is a real-time control solution which is able to control and monitor patrol activities easily, with very low deployment cost and enhanced your customer's confidence.

"..I want to know whether a guard is alive..."

* COO Security Services, 

"..Are guards located where they should be..."

* Security Manager, 

"..I want to know that a route was performed according to plan"

* Security Officer, 

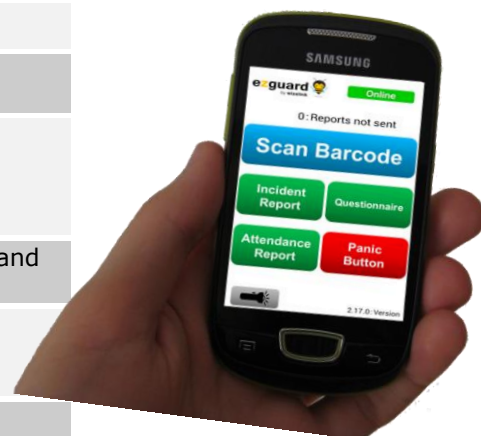

"..Did a route start on time"

* National Operation Manager, 

...Basically, it's all about real-time control
